NUJOINT PLUS HELPS TO PROTECT AND HEAL NATURALLY, WITH TARGETED THERAPY

- ✓ PROTECT HEALTHY JOINTS
- ✓ REBUILD CARTILAGE
- ✓ LUBRICATE FOR FLUID MOVEMENT
- ✓ REDUCE INFLAMMATION
- ✓ EXPAND MOBILITY AND FLEXIBILITY

The most powerful and effective hip and joint supplement on the market today, NuJoint Plus® contains only the highest quality pharmaceutical, human-grade ingredients - the same ingredients found in supplements made for people suffering from arthritis and joint pain. This combination of ingredients creates a frontline defense against damage by lubricating joints and protecting or repairing cartilage that could be damaged by hip dysplasia or osteoarthritis.

Its ingredients - Glucosamine, Chondroitin, Methylsulfonylmethane (MSM) and Vitamin C (Ester-C) - have been compounded for maximum potency and efficacy.

Our chewable wafers are tasty for your dog to eat and easy to digest. Giving your dog NuJoint Plus® as a daily supplement can help to keep their joints healthy and pain-free, providing them with increased mobility, enhancing their quality of life.

**Forefront of Pet Health**

NuVet Labs has been on the forefront of pet health since 1997, with more than 300,000 pets helped. We stand behind our supplements with a 100%, 60 day, satisfaction guarantee\*

**Healing  
Strengthening  
Prevention**

Young or old, your dog doesn't have to suffer from the pain and mobility limitations of Arthritis, Osteoarthritis, Joint Pain & Hip Dysplasia."

Hip and Joint Therapy that works! For dogs of all ages, NuJoint Plus® is a nutrient rich, all-natural, anti-inflammatory hip and joint therapy supplement that goes directly to the source, providing:

**Healing**

For dogs suffering from arthritis, osteoarthritis, joint pain and hip dysplasia, NuJoint Plus® can help heal problem joints and bone ailments with natural healing ingredients, easing the suffering of your pet.

**Strengthening**

NuJoint Plus® can help improve the overall joint health and mobility of dogs. Helping to keep them as pain-free as possible so they can lead a longer, happier life.

**Prevention**

For dogs that are prone to develop hip and joint issues, NuJoint Plus® helps lubricate joints and rebuild cartilage keeping your pet as healthy as possible.

**Ingredients**

**MSM (Methylsulfonylmethane)** supplies biologically active sulfur to animals' joints. MSM has been shown to reduce the rigidity of cells in the soft tissues of the body. By increasing the cells' flexibility, fluids are able to pass more freely helping to reduce cell pressure, thereby reducing inflammation and pain.

**GLUCOSAMINE** provides the joints with the building blocks needed to repair the damage caused by osteoarthritis. Acting as a catalyst, Glucosamine helps animals synthesize new cartilage needed to replace damaged cartilage caused by wear and tear. Hip dysplasia occurs when normal wear and tear breaks down the cartilage.

**CHONDROITIN** attracts and holds fluid within cartilage tissue helping to lubricate joints, increase mobility and reduce discomfort caused by hip dysplasia. Chondroitin neutralizes the destructive enzymes that are known to damage and destroy cartilage. Chondroitin aids the absorption of Glucosamine into inflamed joints.

**VITAMIN C (ESTER-C®)** promotes cartilage growth and tissue repair and is a key factor in the immune system, helping white blood cells function. Prolonged Vitamin C deficiency will cause existing tissues to deteriorate. Ester-C® Calcium Ascorbate is a unique and patented form of vitamin C. It is made using a proprietary, water-based manufacturing process which results in a pH neutral product that contains naturally occurring vitamin C metabolites. These metabolites activate the vitamin C molecules making it easier for the body to transport them from cell to cell for numerous health benefits.

NuJoint Plus® has improved my Akita's daily life more than I can say. Lucy no longer seems to be suffering from pain... is running up and down our hilly yard like a young dog and no longer responds to two legged folks with a growl, howl or warning should they get close to her hind end. I wish that I had found NuJoint Plus® sooner but no matter what it has done the job. I still am amazed...less than 2 weeks after her first dose of 3 tablets daily Lucy was rejuvenated.

- Myrna P., Missouri

Our 6 year-old black lab has suffered with severe hip dysplasia for the past year and a half. It was to the point where we would have had to put her down in anywhere from 3 to 6 months because of her inability to get around and the suffering she was going through. Within 3 days of being on the NuJoint Plus®, Chica jumped up onto the bed... something she hasn't been able to do in over a year. She has now been on NuJoint Plus® for a total of 10 days and we have seen DRASTIC improvement in her ability to go up and down stairs, she can get in and out of our pool on her own, she has more energy overall.

- The Hendersons, Nebraska

We have a 13 year old Spinone. She is 80 lbs and has had severe arthritis and skin allergies for several years. She has been on NuJoint Plus® and NuVet Plus for 3 months and we have seen a remarkable difference, she is much more mobile, shakes far less and even jumps and hops again when she is excited.

- The Billingsleys, Colorado

I tried both the NuVet wafers for all 3 of our dogs, and NuJoint for Michael, the one with the joint problems. Four weeks later, we have been able to completely wean Michael off of the Rimadyl!! This is significant. In addition, he is more alert, will even play with the other two younger dogs and is definitely enjoying a better life.

- Donna W., Virginia

My Doberman recently had very bad back problems and was put on VERY strong pain medicine in HIGH doses. After going to her chiropractor, Bogus was put on Nu Joint Plus as well. That was eight months ago, and she hasn't had a bad day since.

- Jennifer R., Texas

Our Katie had been showing signs of joint problems. We initially made sure her diet was excellent, we provided a bench to get on and off the bed and she still whimpered and cried at times just getting on and off the couch. We were very concerned and then we discovered that you also had NuJoint Plus. We ordered NuJoint Plus for her and within 2 weeks we noticed a remarkable improvement in her overall mobility. Katie seemed perkier and happier. Her energy and endurance kept improving. She acts and feels like a much younger dog and easily keeps up with her now one year old cocker brother!

- Chris & Suzanne K., California
